## **Praeses Releases Android Version of PocketRx, Prescription Refill Mobile Application**

*Pharmacies can now offer customers the mobile convenience for Android device users*

SHREVEPORT, LOUISIANA – December 12, 2011 – Praeses, a national leader in providing trusted information management services and mobile applications, today announced the release of a new Android version of its popular application, PocketRx, which brings prescription refill services to the mobile device user. With the PocketRx Android version, pharmacies can now offer a mobile solution to even more customers using mobile devices to refill their prescriptions at any time – from any location.

Praeses launched the PocketRx prescription refill mobile application in June of this year for the Apple iPhone. The application allows pharmacy customers to refill their current prescriptions using that smartphone.

“The move to a mobile application has proven to be a great success,” said Steven Boyd at Causey’s Pharmacy. “We have had a significant amount of downloads from the iTunes Store and we anticipate the number for prescription refills from Android devices to help us continue to grow in our ability to reach our mobile customers.”

The Android version of PocketRx, downloadable from the Android Marketplace, boasts the same list of features present in the iPhone version and includes customized screens with pharmacy logo and information, great user experience with simplified data entry, and even bar code scanning to make the refill process more efficient. Each application can be customized for individual pharmacies and integrates easily with current or proposed pharmacy management systems.

“Praeses continues to grow our mobile applications portfolio, and we are pleased to announce our latest version of PocketRx, allowing pharmacies to reach an even larger smartphone customer base,” said Kempton Schwab, President at Praeses.

Currently the PocketRx application has been integrated with the Apple iPhone and most Android devices. Windows Phone 7 and Blackberry versions are anticipated in the immediate future.

For more information about PocketRx, contact a Praeses mobile specialist at (318) 424-8125 or via email at [pocketrx@praeses.com](mailto:pocketrx@praeses.com) or visit us at [www.pocket-rx.com](http://www.pocket-rx.com).
