Praeses To Speak At Louisiana Technology Council's Technology Road Show

Opportunity to share unique technologies with other businesses in Lafayette and New Orleans

SHREVEPORT, LOUISIANA – July 15, 2011 – Praeses, a national leader in providing trusted information management services and mobile applications, today announced that it has been chosen to be one of the six companies to present at the upcoming Louisiana Technology Council's Technology Road Show to be held in Lafayette and New Orleans.

The Lafayette Road Show is slated for Tuesday, July 19th, and the New Orleans Road Show on Tuesday, July 26th. Each evening will consist of six presentations with two organizations represented from each of the non-hosting cities. Each presentation will last approximately 15 minutes and each presenting organization will have the ability to promote their technology and network with other companies.

"As innovative and cutting-edge technology leaders in the state, we are always looking for opportunities to share our uniqueness with other companies," said Rob Parker, ITC Business Manager at Praeses. "The Louisiana Technology Council's Road Shows afford us the opportunities to do just that."

For more information visit the Louisiana Technology Council's website at www.ltc-la.org.

About the LTC

The Louisiana Technology Council (LTC) originally known as the New Orleans Technology Council (NOTC) was created in early 1994. Several major organizations along with the University of New Orleans and the City of New Orleans were among the founders of the NOTC. The LTC was launched with funds from the City of New Orleans but since its second year of existence, the LTC has not received any outside funds from any other organization. All investments into the LTC are derived from membership, sponsorship of events and the events themselves. In late 2002, Mark S. Lewis, an LTC Board of Directors member, became President and began a new era by focusing on providing members with value for their membership and sponsorship investments. Several new initiatives were implemented including the creation of numerous Special Interest Groups (SIG's), the implementation of Homeland Security Forums, expanded Tech Tuesday events, eWARDS, a membership directory, and more. Also key to the tremendous growth of the LTC is the desire to form key partnerships with the City of New Orleans, the Louisiana Department of Economic Development, Greater New Orleans Inc., local universities and other tech councils across the state.
