Praeses Awarded Project through NSRP for Digital Deadweight Survey Project

Award totals \$150K to develop a mobile application to increase efficiency

SHREVEPORT, LOUISIANA – October 20, 2015 – Praeses, a national leader in innovative software development and services, announced today that its Business Technologies Division has been awarded a position on the National Shipbuilding Program Business Processes panel with Marinette Marine, DRS Advanced Marine Technology Center, and Gibbs & Cox for \$150K to produce a mobile application to increase the efficiency of the deadweight survey process. This mobile application, called WeightCheck, will leverage modern mobile technology to provide relevant weight survey data on the deckplate where it is needed most.

The project team hopes to eliminate the double and triple entry of data that occurs to support the deadweight survey. In addition, the team hopes to eliminate paper-based processes around the deadweight survey and begin transitioning to a more digital process.

About Praeses

Offering proven and consistent business success through a unique combination of people, process, and results, Praeses is a leader in innovative software development and services. Its client base of local, national, and international organizations includes small businesses, Fortune 100 companies, state and local governments, and the Department of Defense.

Employing a team of versatile professionals, Praeses offers an exceptional range of experience and expertise — aligning clients with its professionals to yield focused applications and solutions to business problems.
