Praeses Announces SmartCAMA Application at Louisiana Assessors' Association Conference
Mass Appraisal System Developed for Bossier Parish now Available for other Municipal Governments

SHREVEPORT, LOUISIANA – August 14, 2017 – Praeses, a national leader in innovative software development and services, unveiled its SmartCAMA application developed for Parish and County Assessors at the annual Louisiana Assessors' Association Conference held in New Orleans, LA June 12-14, 2017. SmartCAMA provides Assessors with a modern, secure, highly-configurable, cloud-hosted system designed to support mobile and desktop environments.

Originally developed for the Bossier Parish Assessor's Office, SmartCAMA is designed to support the current and future needs of today's assessor. SmartCAMA allows assessors to easily track home improvements within the system to ensure accurate and up-to-date property values, is easily searchable by many criteria and offers GIS integration, flexible reporting and full audit tracking.

"Praeses partnered with Bossier Parish to build a system that exceeds our expectations, helps improve our processes and deliver value to our constituents. Throughout the development process, Praeses made sure that they understood our needs and incrementally delivered functional software to support our office; we could not be happier with Praeses, the process that we employed throughout the project and the system that they have delivered," said Michelle Rodgers, Bossier Parish's Deputy Assessor. Rob Parker, Director of Praeses' Business Technologies division added, "Praeses is proud to work with Bossier Parish on this project and looks forward to continuing to support the assessor's office; we are also excited about the opportunity to expand SmartCAMA into additional parishes and counties to provide a modern solution that meets their needs."

For more information about SmartCAMA, call Praeses at 318-424-8125 or email BTsolutions@praeses.com.

About Praeses
