

FOR IMMEDIATE RELEASE

UNITED STATES AIR FORCE SELECTS PRAESES AS A MODERNIZATION PARTNER TO AIR MOBILITY COMMAND

Praeses' Rook Platform™ for Air Mobility Command will Enhance Operational Performance and Bolster National Security.

2023 – JULY 19 Praeses, a software development company known for the data fusion and data visualization capabilities of its Rook Platform™, announced today that it was awarded a Direct to Phase II contract through the Small Business Innovation Research (SBIR) Program by the United States Air Force. This award affirms the tremendous value Praeses' advanced technology brings to the country's national security and its warfighters in defining air mobility mission planning and execution.

At Scott Air Force Base in Illinois, Praeses will continue adding new features to its existing Rook Platform application called "CURE" that supports watch officers at the 618th Air Operations Center (618 AOC), an organization within Air Mobility Command (AMC). CURE will further advance the Rook data fusion engine deployment at Scott AFB by consolidating data from diverse sources to support global mobility operations mission planning and execution for AMC. It will significantly improve efficiency for air mobility leaders supporting warfighters around the globe.

Praeses has a strong history of providing premier solutions to the US Government at a fraction of what its competitors offer. With its leading-edge capabilities and commitment to open architecture, Praeses delivers value daily to our nation's warfighters, assuring customers it does not create vendor lock-in.

J.D. Hunsicker, Vice President of Government Programs at Praeses, said, *"For more than 3 years, we have been working alongside AMC to help them deliver real-time, actionable data, empowering them to make informed air logistics decisions that are critical to national security. This latest contract deepens our alliance and underscores the trust AMC places in our advanced global mobility situational awareness capabilities."*
