

FOR IMMEDIATE RELEASE

## WEST FELICIANA PARISH ASSESSOR SELECTS PRAESES' SMARTCAMA™ SOFTWARE TO MODERNIZE ITS CAMA AND ASSESSOR INFORMATION MANAGEMENT SYSTEM

West Feliciana Parish part of a growing movement of Assessors embracing Praeses' AI-powered technology to solve problems with existing solutions

February 26, 2023. The West Feliciana Parish Assessor's office recently selected Praeses' SmartCAMA software application to modernize its Computer-Aided Mass Appraisal (CAMA) and its Assessor Information Management System (AIMS). The West Feliciana Parish Assessor, Richard Kendrick, operates on the principle that every single person in the parish has their property assessed fairly and impartially. SmartCAMA is a web-based application that empowers assessors, employees, and citizens alike towards this common goal. SmartCAMA is a market-tested and proven technology product for assessors, and the West Feliciana Parish Assessor's Office now joins the growing number of Parishes in Louisiana to adopt the technology.

With this selection, West Feliciana will have modern and enhanced capabilities of SmartCAMA including:

- **Modern, intuitive, web-based interface** that allows assessors' offices to improve office efficiency and empower employees.
- **Powered by Artificial Intelligence (AI)** to ensure accurate, fair, and equitable assessments
- **Cloud-based Solution with Security** as its cornerstone, offering scalable performance to align with resource demands.
- **Open Architecture:** Integrate with nearly any third -party application using secure APIs.
- **Automated deployments** ensure that new features and updates are easily deployed to users on a regular basis.
- **Efficiency:** A fully integrated CAMA and AIMS system allows assessor's office employees to conduct all daily tasks through the same interface and enables

constituent self-service through a number of fully integrated, citizen-facing features.

- **Flexibility:** Robust feature set designed with flexibility for unique configurations to meet individual assessor's needs.

"Praeses is excited to welcome the West Feliciana Assessor's office to our growing list of SmartCAMA customers, who realize that their current solutions are inadequate and recognize the stability, security, and reputational value that we provide. Praeses couples its powerful SmartCAMA technology with unparalleled commitment to customer service, to ensure that we will meet the needs of Richard's office and constituents," said Matt Teague, SmartCAMA's Head of Business Development. Matt added, "As the fastest growing CAMA system in Louisiana, Praeses is excited to build on our success in our home state to offer the same value and customer commitment to assessors across the nation as we expand into new markets."

Richard Kendrick, West Feliciana Parish Assessor added, "After conducting an extensive search for a software vendor whose platform and customer support meet our needs, we chose Praeses' SmartCAMA application. We are proud to partner with a Louisiana-based company to modernize our system that will allow us to improve efficiencies and better support our constituents."

West Feliciana went live with Praeses' SmartCAMA system in May 2023.
